

Warehouse Management

IDS 552

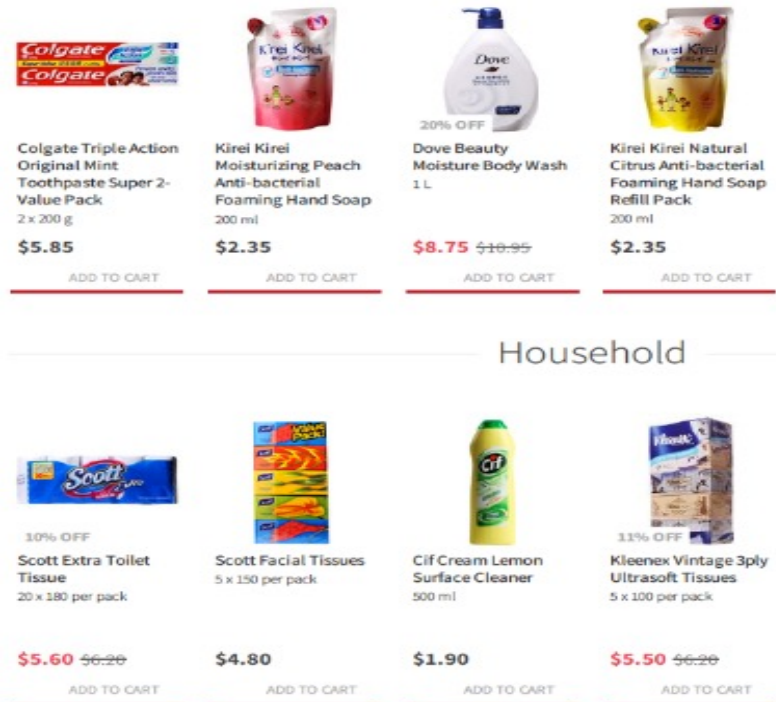

Guest Instructor: Parshan Pakiman

Discussion outline

-
- Warehousing in online retailing
 - Warehousing basics
 - Decisions:
 - How to select equipment and technology
 - How to store products
 - How to pick and ship products (next class)

Logistics of online retailing

UIC
BUSINESS

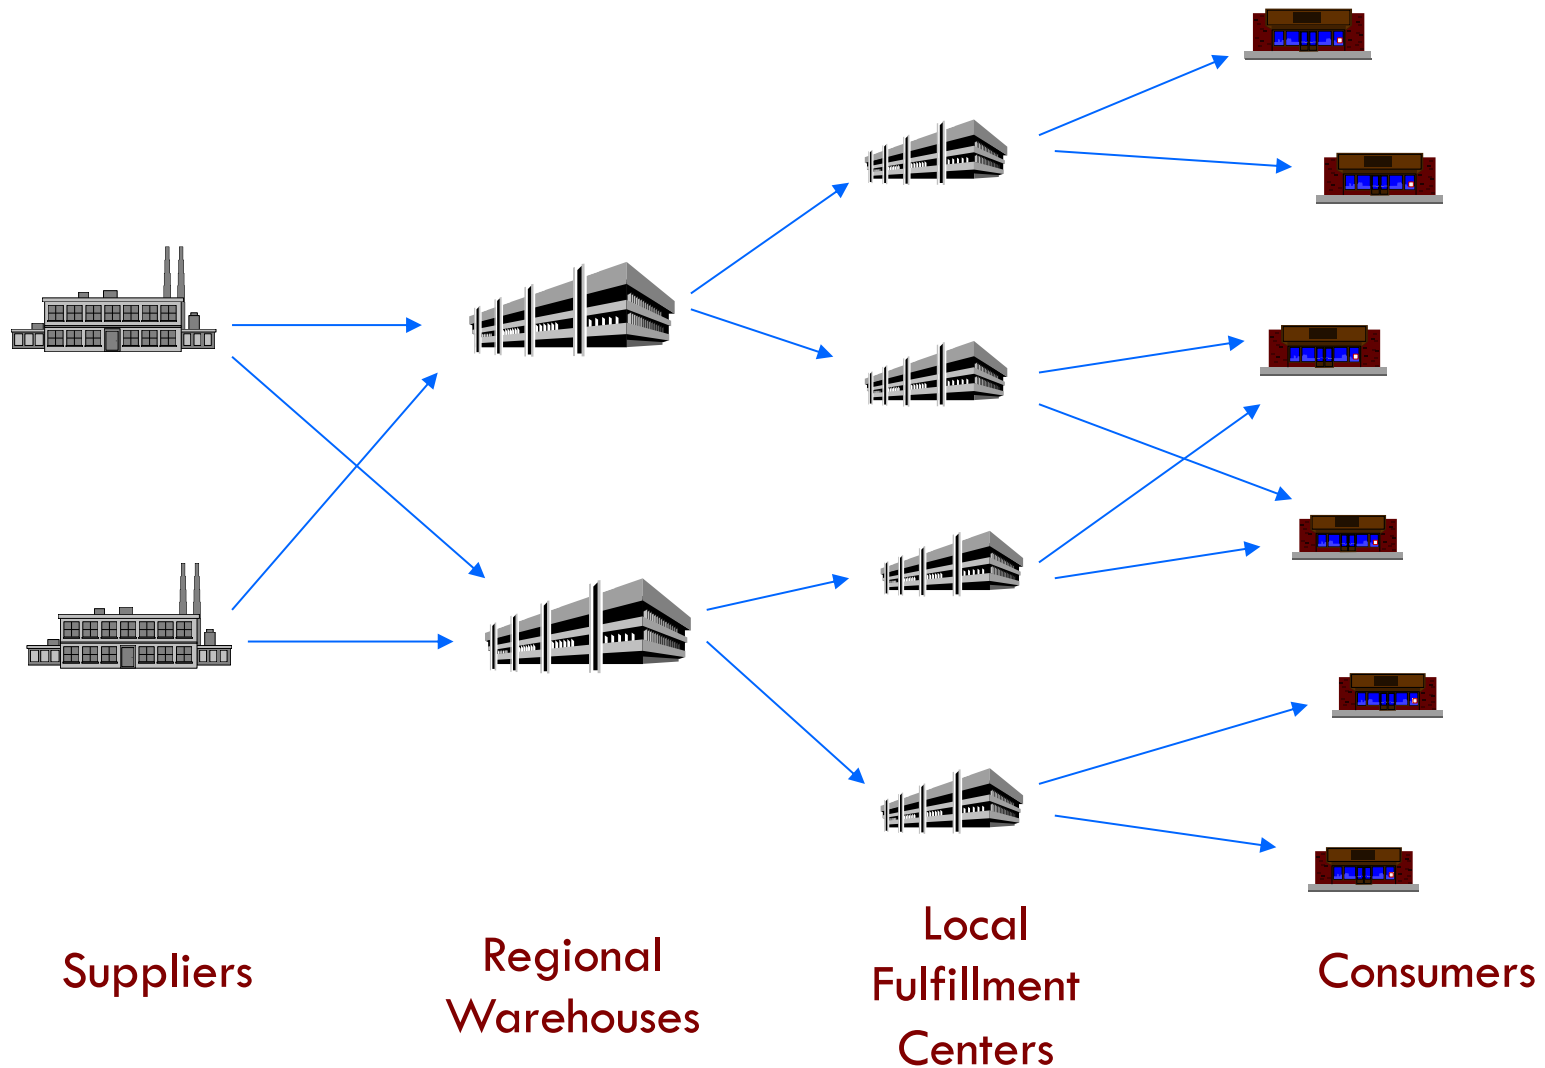

e-Commerce

Logistics

Supply chain of online retailing

Offline and online demand

The difference between fulfillment for offline and online demands

- Fulfillment for offline demands:
 - Ship products to **retail stores**
 - Smaller number of orders
 - Large quantity for each order
- Fulfillment for online demands:
 - Ship products to **end consumers**
 - Large number of orders
 - Small quantity for each order

Warehousing basics

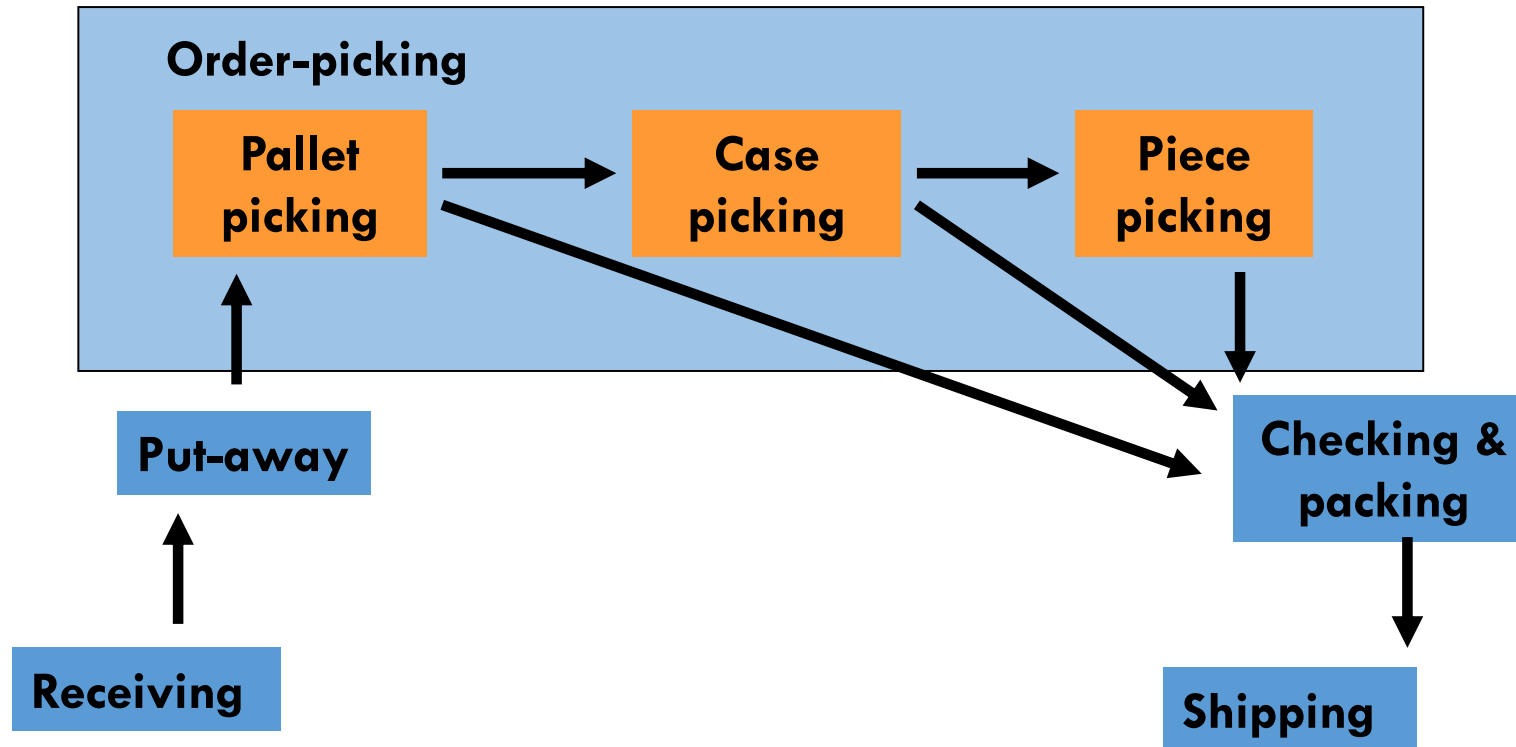

Types of warehouses

- Retail distribution center
- Service parts distribution center
- E-commerce distribution center (fulfillment center)
- 3rd Party Logistic (3PL) warehouse
- Perishable warehouse

Units of handling

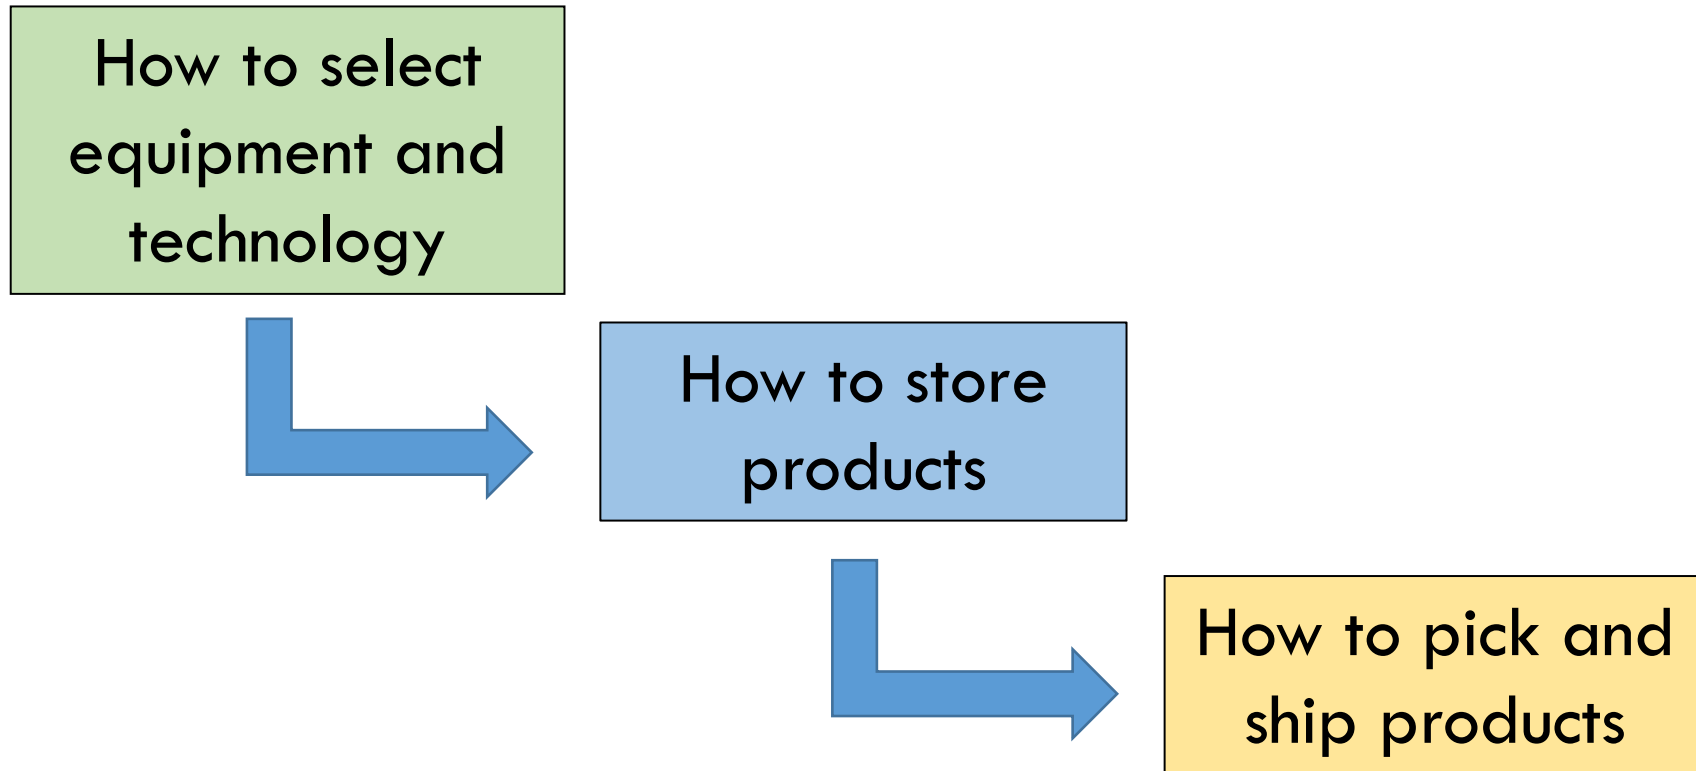

Warehouse operations

- Order-picking costs about 55% of the total operating expense.
- Within order-picking, traveling is the most time-consuming.

How to fulfill orders?

Scenario 1:
Pallet

Scenario 2:
Carton

Scenario 3:
Piece

When does each of these scenarios occur?

Storage equipment

Pallet or case picking

- Pallet racks
 - Bulk storage

Piece picking

- Bin-shelving
 - Slower-moving items

- Gravity flow racks
 - Faster-moving items

Single-deep racks

Easily accessible, require more aisle space

Pallet flow racks

- Shelves are tilted with rollers
- Picking and restocking are performed from different aisles
- For high throughput skus

Bin-shelving

UIC
BUSINESS

Bin-shelving

-
- Shallow shelves
 - Both picking and restocking must be done from the pick face
 - Suitable for slower-moving skus

Gravity flow rack

UIC
BUSINESS

Gravity flow rack

UIC
BUSINESS

Gravity Flow Rack with a pick-to-light system

UIC
BUSINESS

Gravity Flow Rack with a pick-to-light system

UIC
BUSINESS

Gravity flow rack

- Tilted and deep shelves
- One case of a product on the pick face
- High sku density
- Some are supported by a pick-to-light system
- Restock from the back
- Suitable for faster-moving skus

Handling equipment

- Turret Truck (Forklift)
- Order-Picker Truck
- AS/RS
- Conveyor

Turret truck

For very narrow aisles (5 to 7 feet)

Order-picker trucks

Conveyors

<https://www.youtube.com/watch?v=KgpE1q9s9O0>

Conveyors

Conveyors

- Change the economics of travel
- Partition a warehouse into zones
 - Create problems of balancing work among zones
- Store conveyable product far from shipping
- Store non-conveyable product close to shipping

Other technologies

- **High-density storage systems**

- <https://www.youtube.com/watch?v=iyVDMp2bL9c>

- **Kiva robots**

- <https://www.youtube.com/watch?v=UtBa9yVZBJM>

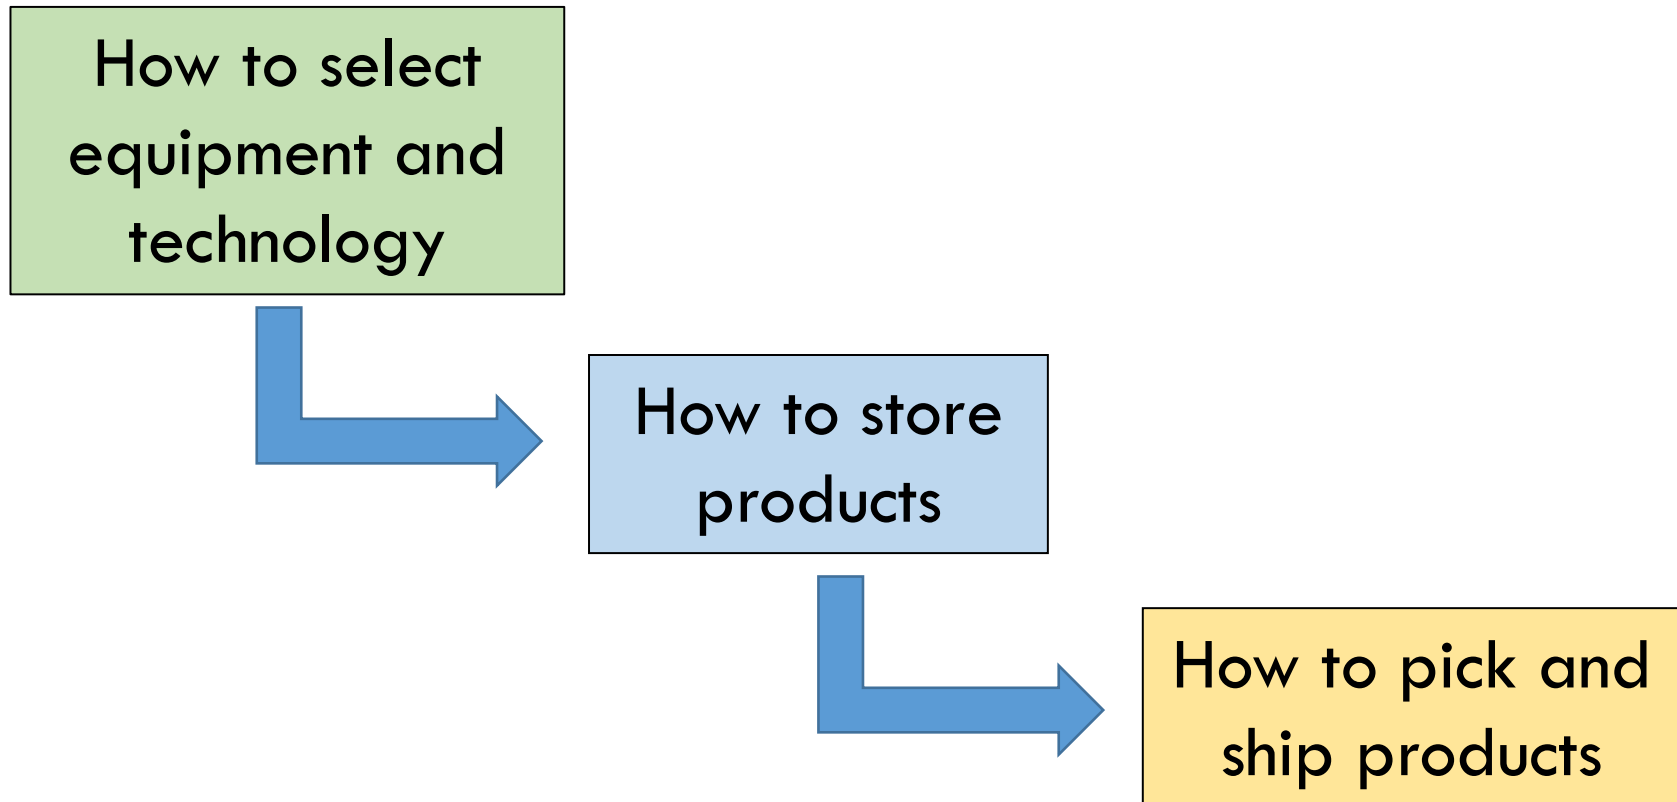

- **Amazon's drones**

- <https://www.youtube.com/watch?v=Le46ERPmiWU>

- **Meijer automation**

Summary

-
- How to fulfill customer orders?
 - How to select equipment and technology?
 - Pallet racks for pallets
 - Bin-shelving for slower-moving items
 - Gravity flow racks for faster-moving items
 - How to store products?
 - Use fast-pick areas to reduce response time
 - How to pick and ship products?
